WORKSHOP FOR PESTICIDE APPLICATORS

Pesticides, when used properly, are an excellent tool to control damage from unwanted insects. Used improperly, they may cause lasting harm. The Utah Community Forest Council will conduct a daylong pesticide applicators workshop on Friday, October 8, 2004, at Sandy Bicentennial Pavilion, 510 East 8680 South, Sandy, Utah.

Experts from Utah State University and the Utah Department of Agriculture will detail pesticide and groundwater contamination concerns and show how to use pesticides safely. They will also discuss pesticide formulations and common insect pests found in trees.

The day's training provides seven continuing education units for International Society of Arboriculture Certified Arborists and Utah Licensed Pesticide Applicators. Registration fees include box lunch and break refreshments. To register, or to get additional information, call (801) 484-3004.
